My kit is suitable for short films, music promos, documentaries, advertisements and any other genre. I had the chance to produce, direct and shoot in multiple environments and weather conditions from extreme hot deserts to 4800m high extreme cold mountains using my tools.

I can provide great rates on any other kits suitable for higher productions (cinema standards...) such as: **ARRI** Alexa mini & **RED** cameras with **PL** mount **ARRI**, **ZEISS** & **LEICA** lenses with lighting, grip, crew and other equipment.

Do not hesitate to contact me for inquiries or quotations.
